Reciclean®

Saves and cleans water

Reciclean® has been specially developed to clean your greenhouse water and irrigation system. Reciclean prevents clogging of pipes and drippers. A clean system gives every plant equal rates of irrigation water, resulting in equal plant growth. Reciclean also increases the lifetime of your system and is safe for both plants and roots.

Quality – Purity – Solubility – Availability

Quality – Purity – Solubility – Availability

Reciclean®

Continuous and equal irrigation

- Efficient cleaning throughout the whole season: 25-35 ppm Reciclean® is sufficient to keep pipes and nozzles clean
- Contains formic acid and activated hydrogen peroxide (H₂O₂)
- 1000 times more effective than hydrogen peroxide alone
- The peroxide decomposes into water, CO₂ and oxygen, providing the roots with the extra oxygen required for growth

Advantages

- Both organic and inorganic deposits dissolve evenly and completely over a short period of time
- Calcium deposits in the piping and drippers are dissolved
- Introduction of extra oxygen in the substrate
- Can be continuously used throughout the growing period
- No harmful residues in greenhouse grown vegetables, herbs or ornamentals
- Environmentally friendly
- Safe and easy to use
