

## The Prayon Group

With more than a century of industrial experience, Prayon is a world leader in the production of phosphoric acid and phosphates. Based in Belgium (Engis), the Prayon Group employs about 1,400 people in some 20 companies located in more than 10 countries. We have three industrial sites in Europe (Engis and Puurs in Belgium, Roches de Condrieu in France) and one in the United States (Augusta, Georgia). For our commercial operations, we have local offices in our key European markets (the Benelux countries, France, Spain, the United Kingdom, Italy and Germany) and one in the United States. In addition to these offices, we have an extensive worldwide network of branch offices selling Prayon's products.

**Water soluble fertilisers  
for all your plants' needs**

Quality - Efficiency - Reliability

**Hortipray is a new range of water soluble fertilisers developed to satisfy the most demanding requirements of growers and consumers. Provided by the Prayon Group, these first-class products supply fruits, vegetables, flowers and plants with optimal rates of nutrients in the most efficient way.**

**With Hortipray, both crop yield and quality are maximised.**

### **Global solution**

Prayon has for long been one of the leading European manufacturers of high-quality fertilisers. Our **MKP** (Mono Potassium Phosphate) and **MAP** (Mono Ammonium Phosphate) have an established worldwide reputation for their high efficiency in horticulture. To better satisfy the needs of our customers, we now offer a global solution with a comprehensive range of essential plant nutrients. Prayon is the exclusive distributor (\*) of **Potassium Nitrate** produced by Kemapco (Jordan). In addition to these three main straight materials, we have now extended our portfolio of soluble fertilisers by adding other **straights** and **NPKs**. Growers and distributors now have a one-stop-shop for most of their needs.

(\*) In Europe, Turkey and Maghreb.

### **Reliability**

We are a reliable partner. With decades of know-how and our own production of  $P_2O_5$ , we are recognised as a long-term and serious partner that guarantees the delivery of first-quality products. Our customer focus and flexibility are valued by our clients.

### **Quality**

Quality is not a buzzword at Prayon. We are dedicated to maintain the very highest quality standards for our customers. On top of our own production of first-class MAP and MKP, we are now distributing Potassium Nitrate that is manufactured using the recognised Kemira process, which further demonstrates our commitment to quality.

### **Efficiency**

The efficiency of our products is a priority at Prayon. Our fertilisers contain optimal rates of nutrients and are characterised by extremely high levels of purity and solubility. Once applied, they are easily absorbed by the plants.

### **Expertise**

With more than twenty years of experience in producing base materials for water soluble fertilisers, we at Prayon have gained a true understanding of the particular requirements of growers. Based on this expertise, we are now in a strong position to offer a wide product range and to develop new products for the horticulture market.
